EDUCATION

- B.Tech - Computer Science and Engineering

Shiv Nadar University

2024-2028

CGPA: 8.8

- B.S. in Data Science

Indian Institute of Technology Madras (IIT Madras),

Foundation Level – Completed, Currently pursuing Diploma in Programming

CGPA: 8.6

PROJECTS

1. JanSetu – Inclusive Public Services for the Homeless

Flask, Firebase (Firestore & Auth), Google ML Kit (Face Detection), HTML, CSS, JavaScript

- Built a platform enabling undocumented individuals to access welfare benefits with face-based authentication.

- Implemented a secure Firebase backend with duplicate detection, profile management, and transaction logging.

- Designed NGO workflows and benefit distribution flows with privacy and accountability considerations.

2. Crime Record Management System

Flask, MySQL Workbench, HTML, CSS

- Built a full-stack web application with Flask backend and MySQL database for structured crime record storage and retrieval

3. GSM-Based Automatic Door Lock System

Arduino, Embedded C, GSM (SIM800L)

- Implemented SMS-triggered control logic to unlock the system upon receiving a valid command ("OPEN") with auto-lock handling

4. Pressure Detection Using Microbend Technique

Optical Fiber, Photodiodes

- Analyzed pressure-induced signal loss using optical microbending and validated results through experimental measurements.

TECHNICAL STACK

- **Programming:** Python, Java, C, C++

- **Framework/Libraries:** Flask, Arduino Core Libraries, Java Standard Libraries

- **Web Technologies:** HTML, CSS

- **Core CS:** Data Structures, Database Management Systems

- **Skills:** Problem Solving, Algorithmic Thinking, Debugging, Input Validation, Error Handling, Modular Programming, SQL Querying, Logical Thinking

- **Certification and Courses:** Programming in Java [NPTEL]- Percentage:85

ACHIEVEMENTS AND HONORS

- Maintained a CGPA of 8.8 in B.Tech Computer Science and Engineering.

- Demonstrated consistent engagement in coding and problem-solving practice.

- Successfully built and deployed multiple academic and IoT-based projects.

- Completed a full-stack Crime Record Management System using Flask and MySQL.
